The Herculan SR National system is a seamless, spike-resistant system with point-elastic properties. Herculan SR National complies with the current European requirements according to EN 14877. The system is included in the IAAF list of approved and classified athletics tracks and is suitable for both national and international competitions.

The high-performance, seamless Herculan SR National system consists of a rubber underlayer in-situ installed, to which several strong, flexible, polyurethane spraycoat layers are added. Herculan SR National is water-permeable, spike-resistant and weather-resistant. The system is durable and suitable for use in all weather conditions.
